DETAILED ACTION

Reason for allowance

1. Claims 22-65 are allowed. The following is an examiner's statement of reason for allowance:

A/ Applicants' filing of The Terminal Disclaimer has overcome the double patenting rejection of claim 22- 65.

B/ I/ Group I: Claims 22-33.

Claims 22-33 are allowed because the prior fails to teach the limitations:

-- “ a first magnetic film covering a back surface and side surfaces of the first wiring, the back surface being opposite to a front surface of the first wiring that faces the magnetoresistance effect film, wherein each portion of the first magnetic film that covers the side surface of the first wiring extends across a plane including the front surface with an insulating film interposed between the magnetic recording layer and the portion of the first magnetic film covering the side surface of the first wiring. “--

and all other limitations as recited in claim 22.

II/ Group II: Claims 34-41.

Claims 34-41 are allowed because the prior fails to teach the limitations:

-- “ a first magnetic film covering a back surface and side surfaces of the first

wiring, the back surface being opposite to a front surface of the first wiring that faces the magnetoresistance effect film, wherein the magnetic recording layer is wider in the width direction than the first wiring, and each portion of the first magnetic film that covers the side surface of the first wiring is in contact with a surface of the first nonmagnetic layer on the side of the first magnetization pinned layer. “--

and all other limitations as recited in claim 34.

III/ Group III: Claims 44-53.

Claims 44-53 are allowed because the prior fails to teach the limitations:
--“a first magnetic film covering a back surface and side surfaces of the first wiring, the back surface being opposite to a front surface of the first wiring that faces the magnetoresistance effect film, wherein the magnetic recording layer is wider in the width direction than the first wiring, an oxide layer is formed on a portion of a surface of the magnetic recording layer that faces the front surface, the portion is not covered with the first magnetization pinned layer, and each portion of the first magnetic film that covers the side surface of the first wiring is in contact with the magnetic recording layer via the oxide layer. “--

and all other limitations as recited in claim 44.

IV/ Group IV: Claims 54-65.

Claims 54-65 are allowed because the prior fails to teach the limitations:
-- “ a first magnetic film covering a back surface and side surfaces of the first wiring, the back surface being opposite to a front surface of the first wiring that faces

the magnetoresistance effect film, wherein each portion of the first magnetic film that covers the side surface of the first wiring extends across a plane including the front surface with an insulating film interposed between the magnetic recording layer and the portion of the first magnetic film covering the side surface of the first wiring. “-- and all other limitations as recited in claim 54.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance”.
